LOCATION HISTORY

The project of construction of Swimming Pool Saint-Georges fits in a work campaign related to the restoration of Saint-George palace located just next to it. The architect Emmanuel Le Ray is in charge of the building work and finds his inspiration with the thermal swimming pool of the city of Nancy and the ideas of the architect Louis Bonnier. Alain Le Bourget draws the decorations of the frontage that the ceramists Gentil and Bourdet realize as well as the sandstone decorations of the hall. Lastly, the mosaic of the basin is the work of the Odorico Workshop.
